Re: *Revision to Technical Definition in Pending Exclusion Request for Wide High-Precision Cold-Rolled Steel (X-061.5)*

Dear Ms. Blue:

This letter is filed on behalf of Nippon Steel Corporation ("NSC") to correct a typographical error in the technical definition provided in its November 13, 2001 exclusion request for Wide High-Precision Cold-Rolled Steel (identified on the Office of the U.S. Trade Representative's web site as X-61.5). NSC revised the definition of this product in its January 15, 2002 filing, but has subsequently found a typographical error in both definitions. Specifically, the thickness definition should be revised to replace the word "width" with the word "with." The corrected definition is as follows:

(1) Mechanical properties:	TS \geq 50KSI YP \geq 32KSI EL \geq 33% 60 \leq HRB \leq 75
(2) Major chemical contents:	Carbon: 0.13 % or less Manganese : 0.60 % or less

PUBLIC DOCUMENT

	Phosphorous: 0.03 % or less Silicon: 0.04 % or less Sulfur: 0.03 % or less
(3) Thickness:	0.047" to 0.09", with tolerance of +/-0.0008"
(4) Width:	36" to 49"
(5) Roughness:	0.4µmRA or less (RA: average roughness)

If you have any questions or need additional information, please contact any one of the undersigned. Thank you for your assistance in the filing of this submission.

Very truly yours,

Joseph H. Price
Donald Harrison
Andrea Fekkes Dynes
Brian Rohal
